You now have an opportunity to offer a world class coffee in your establishment with GAGGIA coffee.

GAGGIA is synonymous with Coffee world over. Achille Gaggia invented the system of coffee making, that you see in coffee bars and restaurants all over the world. In 1938, Achille Gaggia set out to make a perfect coffee and he is said to have used a piston from an American Jeep, and a lever, to force water through finely ground coffee, at a certain temperature and pressure, that bring out all the goodness of coffee. The result is what you now know now as an 'espresso'.

Just after the war the company that Achille Gaggia set up started making coffee machines using his patented technology. Rest is history.
